

Summary

As a beginner front-end developer, I have a strong foundation in HTML, CSS, JavaScript, React, and Tailwind CSS, with hands-on experience in Git and GitHub. I've applied these skills to various projects, developing a keen eye for design and user experience. Currently, I am pursuing a dual degree (B.Tech + M.Tech) at IIT Kharagpur, where my technical skills are complemented by a passion for storytelling. Beyond coding, I'm a published co-author of several books and have a novel available on the Pocket Novel app. Currently, I'm writing a mythological sci-fi thriller that weaves together elements of romance and suspense. My unique blend of technical expertise and creative storytelling drives me to create innovative and engaging user experiences.

Skills

- html
- css
- javascript
- react
- git
- GitHub
- poetry
- story writing
- C programming language
